ABSTRACT

This factbook presents graphs and statistical tables summarizing the characteristics of California students attending public and independent colleges and universities as well as trends in these characteristics, including enrollment, transfer, and program completion. The report is divided into six sections: (1) high school students - information about the number of public and private high school graduates, their origin and academic preparation by region, and their college-going rates; (2) all postsecondary students - information about total student enrollment in California's colleges and universities including comparative data over the last decade; (3) first-time freshmen - data regarding their college-going rates in the California public sector as well as demographic data and a comparison with freshmen in the whole country; (4) transfer students - data on students transferring from community colleges to California universities as well as from other systems; (5) student outcomes - e.g., number of degrees and certificates, graduation rates, and student attrition; and (6) area-specific student data - high school graduates and college-going rates by California county and on community college transfer students. NOVEMBER 2000

COMMISSION REPORT 00-8

HE033569

Summary

This report is the latest edition of the Commission's *Student Profiles*. It provides comprehensive information about students in postsecondary education in California. *Student Profiles* contains information on first-time freshmen and transfer students that formerly appeared in other Commission reports as well as a wide variety of other data profiles, including total enrollment figures and information on student outcomes. Generally, the profiles display information covering the most recent 10-year period and end with data through the immediately preceding academic year -- 1998-99 -- as well as fall 1999 data.

Unlike most Commission reports, *Student Profiles* contains little analytic comment. Instead, the staff encourages readers to use these data as the basis for their own analyses. To facilitate that process, it should be noted that this edition of *Student Profiles* has been added to the Commission's Internet website -- www.cpec.ca.gov -- and is now electronically accessible to the general public. Additional copies may be obtained from the Publications Office of the Commission at (916) 322-9268.

COMMISSION REPORT 00-8
PUBLISHED NOVEMBER 2000

This report, like other publications of the California Postsecondary Education Commission, is not copyrighted. It may be reproduced in the public interest, but proper attribution to Report 00-8 of the California Postsecondary Education Commission is requested.

Preface

Student Profiles, 2000 is significantly different than any of its 10 predecessors. For the first time, all of the data in this report (except full-year California Community College transfer data) may be replicated via the new on-line data function on the Commission's Internet Website www.cpec.ca.gov. Real-time data accessibility for the most recent information available, presented annually in the late summer/early fall in each edition of *Student Profiles*, has been a long-time Commission goal that has come to fruition with this edition.

To facilitate the usefulness of the new on-line data function, individual profiles have been:

- Rearranged by subject rather than by segment of postsecondary education, with titles similar to those displayed on-line,
- Expanded to present data on all postsecondary education sectors for which data are available, and
- Re-numbered so that profiles are in a more consistent and logical order.

Additionally, some titles have been revised to provide more clarity regarding information in each profile. It is hoped that this new version of *Student Profiles* maximizes the availability and usefulness of the data as well as the Commission's role in providing it to parties interested in California postsecondary education data and to the general public.

Appreciation is extended to staff of the postsecondary education segments who make the data available annually to the Commission. Gratitude is extended also to individual Commission staff whose untiring dedication makes this report possible. In particular, the staff of the Information Systems, Academic Programs and Policy, and External Relations units were most helpful. As a result, this edition, more than any other edition in the *Student Profiles* series, is the result of collaboration and team effort.

Introduction

STUDENT PROFILES, 2000 is the latest edition in a series of factbooks issued by the California Postsecondary Education Commission to provide comprehensive information about students in postsecondary education in California. *Student Profiles, 2000* contains a wide-ranging set of graphs and statistical tables that allow readers to gain an understanding of the characteristics, of California students as well as trends in these characteristics, including enrollment, transfer, and program completion. Unlike most Commission reports, the *Student Profiles* series contains little textual comment and analysis about the data. Instead, the Commission hopes these reports provide the basis for such analysis by others.

The primary purposes of *Student Profiles* are to:

1. Provide a context to facilitate policy analysis by presenting a global view of students in California;
2. Permit prompt response to basic inquiries regarding student information;
3. Serve as a basic source of data for research;
4. Function as the Commission's "official" source of student statistics (by supplying correct, agreed-upon data, even if disagreement exists about the manner in which these data might be used in different policy analyses); and,
5. Stimulate the production of special topical reports when specific trends in higher education warrant more detailed analysis and description.

Organization of the report

This report was reorganized twice in recent years for easier identification and location of information. Section 1 now highlights the profiles in the report that display information regarding California high school graduates. Section 2 now contains the postsecondary student enrollment displays.

A Guide to the Contents, highlighting clusters of profiles by subject, has replaced the former sequential table of contents. The entry for each profile in the Guide to the Contents is annotated in such a way as to link it to the same type of information in prior editions of *Student Profiles*. The profiles are clustered in the Guide by subject, with profiles of similar data provided for each higher education sector for which data is available. Of greatest significance with this edition of *Student Profiles, 2000* is that the data is now tied directly to the Commission's source data files insuring that the most current and accurate data appears in the Profiles, and that these data may be replicated by the public at large from the new on-line data function through the Commission's Internet Website.

Student Profiles is divided into these six sections:

1. *High School Students*

This first section provides information about the number of public and private high school graduates, their origin and academic preparation by region, and their college-going rates at California public and independent postsecondary institutions.

2. *All Postsecondary Students*

The second section provides information about total student enrollment in California's colleges and universities in order to provide a context for later sections and an overview of the ways in which California's college student body has changed over the last decade.

3. *First-Time Freshmen*

The third section includes data that were formerly displayed in the Commission's annual *College-Going Rates* reports. In addition to information regarding recent high school graduates and their college-going rates in the public sectors of California postsecondary education, data in this section reflects the origin of all new freshman students, their gender and racial/ethnic distribution, and a comparison of California and first-time freshman enrollment in the United States.

4. *Transfer Students*

The fourth section contains information on students transferring from the California Community colleges to the California State University and University of California as well as facts about transfer students from the other systems to those institutions. The Commission published this information previously in its annual *Update of Community College Transfer Statistics*. However, information in this section has been expanded in order to portray a more accurate sense of student flow.

5. *Student Outcomes*

The fifth section of this *Student Profiles, 2000* report provides information on student outcomes, such as the number of degrees and certificates awarded at the public colleges and university systems, by level, gender, race/ethnicity, and by discipline. Beginning with the *Student Profiles 2000* edition, a number of profiles have been expanded to include more information on student outcomes at the California Community Colleges and the Independent institutions. Ultimately, the Commission would like to present information beyond simply reporting the number of degrees awarded by California's colleges and universities, including graduation rate, student attrition, and persistence information once student-specific data is available from longitudinal databases.

6. *Area-Specific Student Data*

The sixth and final section of *Student Profiles, 2000* provides information on high school graduates and college-going rates by county, and on community college transfer students by district and campus. These tables were previously published in the Commission's annual *College-Going Rates* report and its annual *Update of Community College Transfer Statistics*, respectively. It also includes information by county on completion of the high school courses required for college admission. Information on this subject is also published in the Commission's periodic reports on university eligibility.

Sources of the data

California's colleges and universities are the data sources from which the Commission assembles *Student Profiles, 2000*. The State's public universities submit all of their enrollment and degree data to the Commission in electronic format. The California Community Colleges submit their data to their Chancellor's Office which currently provides the Commission direct access to their database. California's independent colleges and universities submit all of their data to the Commission using hardcopy survey forms generated from the Integrated Postsecondary Education Data System (IPEDS) of the National Center for Education Statistics of the United States Department of Education.

Information on independent institutions

Information on independent institutions is organized using two different sets of institutions. Enrollment information reported for these institutions includes all regionally accredited private two-year colleges and four-year colleges and universities. Information on degrees completed is reported for those independent colleges and universities that are members of the Association of Independent California Colleges and Universities. All postsecondary institutions whose students receive financial aid were required to submit IPEDS data in 1998. With this mandate, independent institutions providing the Commission data increased substantially. Because data reporting prior to 1998 by these institutions had been inconsistent, historical trends in the data may be unclear.

Finally, because information about the independent colleges and universities comes solely from their IPEDS survey forms in which data is provided only in aggregate format, the Commission is more limited in its presentation of the data than is the case for public institutions. In addition, those survey forms do not collect all of the information that the Commission gathers through its individual student record data system.

Caveats

Four limitations should be noted:

- First, the data reflects actual number of students – "headcount students" – rather than calculations of full-time-equivalent students (FTES).
- Second, while *Student Profiles, 2000* includes statistics on students in the State's four major sectors of higher education – the California Community Colleges, the California State University, the University of California, and California's regionally accredited independent institutions – it does not cover statistics on two other areas of interest to the Commission: (1) private institutions in California that seldom submit student data to the Commission, including its non-accredited vocational schools and degree-granting institutions, such as business schools and flight-training institutes; and (2) California students attending college in other states. Both of these types of statistics are needed for *Student Profiles, 2000* to present a totally comprehensive picture of college-going behavior on the part of California's residents.
- Third, data for the sector of independent institutions may reflect significant fluctuations from year to year. This is due largely to inconsistent reporting by individual institutions over the years and

sistent reporting by individual institutions over the years and should not be misinterpreted as unusual student activity in this sector. The Commission is involved in continuous efforts to verify data reports from institutions in this sector in order to more accurately portray the characteristics of students attending these institutions.

- Lastly, data in this latest edition of *Student Profiles, 2000* supersedes data previously reported by the Commission both for the specific year to which this edition is devoted and for the indicated historical period. As a result of the Commission's data verification process, institutions are encouraged to submit revisions to current and prior year data previously reported. These revisions as well as data received after official deadlines are added to the Commission's database on a continuous basis. Therefore, data in this edition should be considered the most accurate available even though it may differ from similar data reported by the Commission in previous editions of *Student Profiles, 2000.*

Format of the report and availability of data

The Commission publishes *Student Profiles, 2000* on paper in a bound report, copies of which may be requested from the Commission's Publications Unit at publicationrequest@cpec.ca.gov . The data tables and graphics were created using Excel software (Version Excel 2000). Most importantly, it should be noted that individual sections of *Student Profiles, 2000*, as well as the data on which the profiles in this report are based, are now available in their entirety on the Commission's Internet web site, which is located at www.cpec.ca.gov. These data may be downloaded from the Internet to a user's personal computer. The footnotes at the bottom of each profile page have also been revised to list the Commission's Internet address as an additional guide to readers with respect to data available from the Commission.

Feedback about a report

Student Profiles, 2000 is published by the Commission as part of its "postsecondary education information clearinghouse" responsibilities. The Commission staff hopes to continue to improve the quality and usefulness of these profiles by soliciting comments from users of this information. The Commission appreciates receiving comments about ways in which to make this report and its other documents more useful as well as advice about any errors of omission or calculations that should be corrected to enhance accuracy. 1 High School Graduates

Note: *Displays have been re-numbered. The numbers in parenthesis below each Profile number reflect numbers from earlier editions of Student Profiles.*

The following displays present data first on all high school graduates from both public and private high schools in California and regionally within the state, then all graduates from public high schools only, followed by data on public high school graduates differentiated by ethnicity. Data is also provided on high school graduates who have completed the ("A through F") sequence of college preparatory high school courses required for admission eligibility at the University of California and the California State University.

2 All Postsecondary Students

Note: *Displays have been re-ordered and re-numbered. The numbers in parenthesis below each Profile number reflect numbers from earlier editions of Student Profiles.*

In this section, the displays have been rearranged by subject, with data provided on each subject for all sectors of California postsecondary education for which data exists (see notes in parentheses in the Contents Guide). As a result, new displays have been added that present information on sectors not previously included in this report.

The displays are arranged to present state and national comparative data, followed by aggregate enrollment data by segment and student level, full-time/part-time status and gender, then ethnic-specific breakouts, age breakouts, and age breakouts by ethnicity within each sector of higher education.

3 First-time Freshmen and New Students

Note: *Displays have been re-ordered and re-numbered. The numbers in parenthesis below each Profile number reflect numbers from earlier editions of Student Profiles.*

In this section, the displays have been rearranged by subject, with data provided on each subject for all sectors of California postsecondary education for which data exists (see notes in parentheses in the Contents Guide). As a result, new displays have been added that present information on sectors not previously included in this report.

The displays are arranged to present state and national comparative first-time freshmen data, college-going rates of California high school graduates, followed by first-time freshmen and new undergraduate student data by segment of origin, by gender and ethnicity, and by county of origin. It should be noted that first-time freshmen are defined as new freshmen-level students aged 19 and younger. New students are defined as students newly enrolling at a campus from prior enrollment at another recognized college or university.

4 Transfer Students

Note: *Displays have been re-ordered and re-numbered. The numbers in parenthesis below each Profile number reflect numbers from earlier editions of Student Profiles.*

In this section, the displays have been rearranged by subject, with data provided on each subject for all sectors of California postsecondary education for which data exists (see notes in parentheses in the Contents Guide). As a result, new displays have been added that present information on sectors not previously included in this report.

The displays are arranged to present overall state data on California Community College transfers first, followed by data on all new undergraduate transfers by segment of origin and by student level within each sector of California postsecondary education. The rest of the section is comprised of various comparative displays of transfer vis-à-vis ethnicity, enrollment and degrees awarded to transfer students. In most cases, data for Fall term transfers are presented, followed by full-year transfer data where available.

5 Student Outcomes

Note: *Displays have been re-ordered and re-numbered. The numbers in parenthesis below each Profile number reflect numbers from earlier editions of Student Profiles.*

In this section, the displays have been rearranged by subject, with data provided on each subject for all sectors of California postsecondary education for which data exists (see notes in parentheses in the Contents Guide). As a result, new displays have been added that present information on sectors not previously included in this report.

In this section, data are presented for each sector of California postsecondary education on overall degrees awarded by degree type and level, followed by data differentiated by ethnicity, by California Community College transfer status, and by academic discipline. Displays of degrees awarded by academic discipline have been significantly expanded to include awards at the California Community Colleges and at the Independent institutions which were not previously included in this report.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

THE California Postsecondary Education Commission is a citizen board established in 1974 by the Legislature and Governor to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature.

Members of the Commission

The Commission consists of 16 members. Nine represent the general public, with three each appointed for six-year terms by the Governor, the Senate Rules Committee, and the Speaker of the Assembly. Five others represent the major segments of postsecondary education in California. Two student members are appointed by the Governor.

As of June 2000, the Commissioners representing the general public are:

Guillermo Rodriguez, Jr., San Francisco; Chair
Alan S. Arkatov, Los Angeles; Vice Chair
Carol Chandler, Fowler
Lance Izumi, San Francisco
Kyo "Paul" Jhin, Malibu
Evonne Schulze, San Diego
Howard Welinsky, Culver City
Melinda G. Wilson, Torrance
Vacant

Representatives of the segments are:

Kyhl Smeby, Pasadena; appointed by the Governor to represent the Association of Independent California Colleges and Universities;

Roger Schrimp, Modesto; appointed by the Board of Governors of the California Community Colleges;

Monica Lozano, Los Angeles; appointed by the California State Board of Education;

Ralph Pesqueira, San Diego; appointed by the Trustees of the California State University; and

Velma Montoya, Los Angeles; appointed by the Regents of the University of California.

The two student representatives are:

Robert A. Hanff, Northridge
Vacant

Functions of the Commission

The Commission is charged by the Legislature and Governor to "assure the effective utilization of public postsecondary education resources, thereby eliminating waste and unnecessary duplication, and to promote diversity, innovation, and responsiveness to student and societal needs."

To this end, the Commission conducts independent reviews of matters affecting the 2,600 institutions of postsecondary education in California, including community colleges, four-year colleges, universities, and professional and occupational schools.

As an advisory body to the Legislature and Governor, the Commission does not govern or administer any institutions, nor does it approve, authorize, or accredit any of them. Instead, it performs its specific duties of planning, evaluation, and coordination by cooperating with other State agencies and non-governmental groups that perform those other governing, administrative, and assessment functions.

Operation of the Commission

The Commission holds regular meetings throughout the year at which it discusses and takes action on staff studies and takes positions on proposed legislation affecting education beyond the high school in California. By law, its meetings are open to the public. Requests to speak at a meeting may be made by writing the Commission in advance or by submitting a request before the start of the meeting.

The Commission's day-to-day work is carried out by its staff in Sacramento, under the guidance of Executive Director Warren Halsey Fox, Ph.D., who is appointed by the Commission.
